

# Helm Partners: Telecommunications & Technology Advisory

Informing Decisions. Accelerating Results.

## Impact

Helm Partners guides our clients through the complex and rapidly changing IT and telecommunications ecosystem to identify and implement solutions to positively impact your enterprise. Through a customized approach focused on your unique challenges and goals, our impact is measured by improving business performance, removing complexity, identifying cost savings, and optimizing your time. For over 20 years, Helm has aided hundreds of businesses through industry-leading research methodologies and actionable recommendations, delivering quantifiable returns on investment.

## Services

Unified Communications

Contact Center

NextGen Network Strategies

Cloud and Managed Services

Cyber Security

Expense Management

## Process

Using our proven client engagement model, Helm performs an insightful analysis to uncover obstacles and highlight opportunities to maximize your business objectives. This initial examination provides the foundation for Helm to lead and execute a tailored go-to-market strategy based on well-vetted criteria specific to your requirements.

Our streamlined plan of action cuts through indecisiveness and vendor confusion, reduces mistakes and delays, and delivers recommendations on strategies objectively validated by comprehensive industry knowledge. The Helm model also provides for ongoing support through the technology transformation and implementation process, impact validation, and ongoing management.
